

To whom it may concern:

I am writing to comment on the possibility of LPFM broadcasting replacing the FM station I currently listen to.

I am a regular listener and supporter of my local K-Love station, 90.9 in Laramie, WY. Laramie is a fairly small isolated community and we are unable to receive many radio signals. 90.9 is a positive and encouraging influence in my life, and losing it would be a huge loss to me and many others in our town. I live alone and spend many mornings, evenings, and weekends listening to and enjoying this station.

LPFM would provide us only with the few locally-owned and operated country and rock stations. I have no interest in this kind of music; my house, therefore, would be filled only with silence instead of the Christian music I depend upon.

In a university town full of college-age students and bars, K-Love provides a positive influence for the entire community. It is family-friendly and always positive - from the music played to the news reports. This station is nationwide and ministers to millions of listeners each day. Its influence and comfort to many is immeasurable.

Please do not replace our local FM 90.9 station with LPFM. It would be a huge disappointment and loss to our community.

Thank you,

Sara Robinson  
Laramie, WY
